

Transplant Referral Data Collection Tool Installation Guide

1. Click the icon/link to download the installation program.
2. Select SAVE and pick a location on your computer (the desktop is a good place). Remember the location where you save this file.
3. After download is complete, go to the location where you saved the file and double-click setup.exe to install the program. You must have administrative rights on your local machine to install this program. If the installation fails, please contact your network administrator to verify that you have correct security permissions.
4. You may change the default location where this program will be installed. Please refer to your network administrator if you have question on where to install this program.
5. Run the program by selecting the "Launch Transplant Referral Data Collection Tool.exe" from the desktop or by selecting the program from the start/programs menu.
6. This program may be uninstalled by removing it using the add/remove programs feature in control panel. Contact your network administrator with questions on program removal.
