

# Build Your Own Poster or Bulletin Board | Example

Create your own poster or bulletin board by cutting out all the art elements provided. This can be a group project in the classroom or a fun activity for students and parents learning from home. Encourage students to have fun creating their own original poster! Ask for a photo of the student with their poster so all can see and celebrate their works of art!

1. Review this completed poster example provided. →
2. Identify all the art elements provided, then print out this entire document on a color printer.
3. Cut out all the elements you've printed.
4. Placement of text is important, so make sure the handwashing instructions are placed in order from left to right.

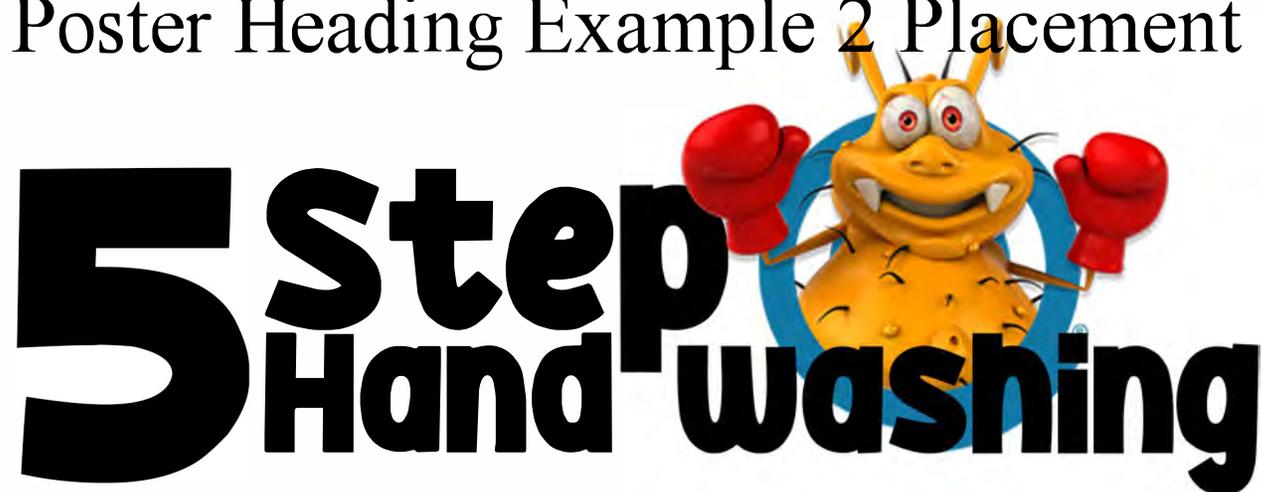

You can download this idea and others at [www.Qsource.org/Kids](http://www.Qsource.org/Kids)

Poster Heading Example 1 Placement

Poster Heading Example 2 Placement

**5** **s** **t** **e** **p**

The image displays the text '5 step' in a large, bold, black font. Each character is surrounded by a dashed black outline, which is a common design for tracing or cutting out letters. The '5' is a simple, blocky numeral. The 's' is a cursive-style lowercase letter. The 't' is a simple lowercase letter with a vertical stem and a horizontal crossbar. The 'e' is a simple lowercase letter with a horizontal top bar and a curved bottom. The 'p' is a simple lowercase letter with a vertical stem and a rounded bottom. The entire text is centered horizontally on a plain white background.
