

## DIY Craft

# Personal Growth Plant

### Instructions:

1. View the example plant.
2. Cut out the pot, leaves, stems, and watering can shapes from the following pages, or create your own using construction paper. You can make the leaves various sizes and shapes to mimic real leaves.
3. On the plant pot, write the subject of your growth tree.
4. On each leaf, write down one of your accomplishments or goals. These could be personal achievements, milestones, dreams, or aspirations. Use a pen or marker to write clearly and boldly, making sure the words are easy to read.
5. Assemble your plant.
6. On the watering can, write something that is an important part of your journey.
7. Add or take away leaves as you progress. As you accomplish more goals or set new ones, add additional leaves to the plant. Likewise, if you achieve a goal and want to remove it from the plant, simply remove it.

### Display and Enjoy:

- Place your Personal Growth Plant in a prominent location where you can see it regularly, such as on a desk or shelf.
- Take time to admire your progress and reflect on your journey whenever you see your plant filled with leaves representing your achievements and goals.

### Additional Tips:

- Get creative with your leaf shapes and colors to make your Personal Growth Plant unique and visually appealing.
- Take photos of your plant periodically to document your progress and celebrate your accomplishments over time.
