Do You Know These Transplant Facts?

- ✓ You do not have to wait until you are on dialysis to get evaluated for the transplant waitlist.
- ✓ Every transplant center has its own criteria to qualify for a transplant. If you do not qualify at one, you may try another.
- ✓ More than 70% of all kidney transplants last at least five years and more than 40% last 10 years.
- ✓ Being on dialysis does not automatically put you on the transplant waitlist — you must get evaluated by a transplant center.
- ✓ Kidneys from living donors are more likely to last longer than those from deceased donors.
- ✓ Age is less important than your overall health when being considered for a transplant. Do not assume you are too old until you are evaluated by a transplant center.

For more information or to file a grievance, please contact:

ESRD Network 12 | 2300 Main St., Ste. 900 | Kansas City, MO 64108 | Toll-Free: 800-444-9965
